Gustavo Cunha Soares dos Santos

Fullstack Developer · Automation · Data

Toledo · PR · Brasil · gustavocunhasoares@hotmail.com · linkedin.com/in/gustavo-cunha-934385184 · github.com/gustavocunha9978

Fullstack developer with systems in production: a multi-tenant SaaS with payments and mobile apps, process automation (RPA, Python, PHP) and computer vision. Currently an RPA developer at a financial institution.

EXPERIENCE

RPA Developer · Financial institution

present

- Build and maintain process automations in Python and PHP
- Migrate UiPath robots (.xaml) to object-oriented Python with DAOs, an API client and legacy-system automation, preserving business rules

Python · PHP · UiPath · RPA · SQL · REST APIs

Fullstack Developer · Personal Manager

Jul 2026 – present

- Built a multi-tenant SaaS: API, web dashboard, two mobile apps and a reception PWA
- Integrated Mercado Pago payments (PIX, cards, subscriptions) with HMAC-signed webhooks
- Shipped to production at a gym with 100+ active members
- Audited and fixed cross-tenant isolation in payment endpoints

Node.js · TypeScript · PostgreSQL · Prisma · Redis · React · React Native · Docker

Web Developer · Maschio & Soares Advogados

Jun 2026

- Delivered the firm's website in Next.js + Tailwind v4, later rebuilt as a custom WordPress theme with no page builder

Next.js · TypeScript · Tailwind CSS · WordPress · PHP

Developer · AI integration · Hackathon Biopark

May 2025

- Integrated Gemini to analyze submitted scientific-paper PDFs
- Built the upload pipeline: watched folder → MinIO → AI analysis

Node.js · Express · Prisma · PostgreSQL · Next.js · Gemini · MinIO · Docker

FEATURED PROJECTS

Personal Manager · Jul 2026–present

Multi-tenant SaaS for gyms and personal trainers: API, web dashboard, two mobile apps and a front-desk PWA. Running in production at a gym with 100+ active members.

People counting with computer vision

On-premise YOLOv8n + ByteTrack pipeline that measures a church's occupancy and attendance in real time, with a web dashboard and zero cloud cost.

UiPath RPA to Python migration

Rewrote UiPath robots as object-oriented Python for a financial process on a legacy system at a financial institution, with behavior identical to the original robot.

Submita, from hackathon to product · May–Aug 2025

Scientific-paper submission and review platform with AI-powered PDF analysis (Gemini). Born at a Biopark hackathon and grown into a product by the same team.

Maschio & Soares Law Firm · Jun 2026

Law firm website. First built with Next.js + Tailwind v4 on Vercel, then rebuilt as a custom WordPress theme with no page builder so the client can edit it on their own.

Predicting mud traps on rural roads · Mar–Oct 2025

Undergraduate thesis: a convolutional neural network over satellite imagery combined with rainfall forecasts to estimate the risk of vehicles getting stuck on dirt roads.

Escalas Life · Aug–Oct 2026

Volunteer scheduling for church ministries, with multiple environments, role-based permissions, unavailability tracking and a monthly auto-scheduler that respects each volunteer's constraints.

This portfolio · Oct 2026

Bilingual Next.js site with MDX content, automated tests, CI and a perfect accessibility score. The code is open: the most direct way to see how I work.

EDUCATION

B.Sc. in Science and Technology

Oct 2025

- Thesis: predicting mud traps on rural roads with a CNN over satellite imagery and rainfall data

SKILLS

Backend
Node.js, TypeScript, Express, REST APIs, WebSockets (Socket.io), Python, FastAPI, PHP

Frontend
React, Next.js, Tailwind CSS, Vite, WordPress (temas)

Mobile
React Native, Expo / EAS, PWA

Data & BI
Power BI, DAX, SQL, Pandas, Recharts

AI & Computer Vision
YOLOv8, ByteTrack, OpenCV, Gemini API, TensorFlow / Keras, OpenAI API

Automation & RPA
Python (RPA), UiPath, Selenium, Web Scraping

DevOps & Infra
Docker, GitHub Actions (CI/CD), Linux, Traefik, Vercel, Railway, Cloudflare Tunnel, RabbitMQ, MinIO / S3

Quality & Testing
Jest, Vitest, Playwright, a11y (WCAG)

Databases
PostgreSQL, Prisma, Redis, Firebase Firestore,
MySQL, Oracle / PL-SQL
